## Prime Numbers

The next year is going to be one of the best ever for Paula and me. Why? Prime numbers. Paula is going to be 61 next month; the month after that, I'm going to be 59 and our son Matthew will be 43. We're in our 23rd year together—and those are all prime numbers. Plus there are 2 of us, and 2 is the only even prime number (a prime number can be divided only by 1 and itself). Things couldn't be lined up better for a great year in our relationship, our health, and our business.

What do prime numbers have to do with it? I've always believed they were special, and the convergence of all those prime numbers gets me excited. I can't explain it. But here's the real question: do I really have to? Anything that gives you a mental edge or can keep you focused and on track—whether it makes any sense in the real world or not—is a good thing. Feel free to think I'm being silly, but prime numbers do it for me. The real question is: what's going to do it for you?

What are you prepared to do today?

*Dr. Chet*
